FIRE DEPARTMENT POSITION TASK BOOK

This Position Task Book (PTB) has been developed to document the required core competencies for firefighter recertification. Each objective lists the performance requirements (tasks) in a format that allows the individual to be evaluated against written guidelines. Successful performance of all tasks, as observed and recorded by a department approved evaluator, will result in a recommendation to the Fire Chief (or designee) of the fire department that the firefighter be recertified in that position.

Evaluation and confirmation of the individual's performance of all tasks may involve more than one evaluator. It is important that performance be critically evaluated and accurately recorded by each evaluator. All tasks must be evaluated before recommending recertification. All statements within a task which require an action must be successfully demonstrated before the task is to be signed off. Several tasks require action by both a lead and backup firefighter. Candidates must successfully complete tasks for both positions. Tasks EAF-1, EXT-1, SFC-3, SFC-4, SFC-5 & VFC-1 involve fire control activities for structure and vehicle fires. In rare & specific cases, simulated procedures may be used to meet the requirements of the above objectives. Firefighter Standards & Training strongly recommends that all attempts to meet the performance requirements be exhausted before simulating these crucial objectives.

The local fire department has the option of either issuing the entire task book to each member seeking recertification as a firefighter, or using the list found on pages five & six of this task book.

RESPONSIBILITIES

The Fire Chief or his/her designee may authorize personnel to be an evaluator and to sign the PTB. Individuals **may not** sign off on themselves.

The Training Chief is normally the designated final evaluator and he/she will review each completed PTB with the Fire Chief or Designee.

The "Evaluator" **CANNOT teach and coach while he/she is evaluating.**

The **Firefighter** is responsible for:

- Reviewing and understanding instructions in the PTB.
- Identifying desired objectives/goals.
- Satisfactorily demonstrating completion of all tasks within the certification year.
- Assuring the Evaluation Record is complete.
- Notifying his/her "Company Officer/Leader" when the PTB is complete and providing a copy for his/her department records.

The **Evaluator** is responsible for:

- Being qualified and proficient in the position being evaluated.
- Explaining to the firefighter the evaluation procedures that will be utilized.
- Identifying tasks to be performed during the evaluation period.
- Accurately evaluating and recording demonstrated performance of tasks. Satisfactory performance shall be documented by dating and signing after completion of the task.

The **Final Evaluator** is responsible for:

- Signing the verification statement inside the front cover of the PTB when all tasks have been initialed and the firefighter is recommended for recertification.
